Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings include reference characters and lead lines that are of poor line quality and are difficult to read. New corrected drawings are required. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/57446 A1 published August 9, 2001 (Note: U.S. Patent 6,540,151 to Steiner et al. ("Steiner") is the U.S. equivalent of WO 01/57446 A1 and is regarded as an English translation of the PCT patent. Steiner is therefore incorporated into this rejection as an English translation and references to figures and columns below refer to the U.S. Steiner patent).

Steiner discloses in Figures 1-8 a vehicle heating device and lining for a combustion chamber of the heating device substantially as described in applicant's claims 1-8. In particular, Steiner shows a lining member/sieve element (6) of porous material formed for fuel forwarding by capillary action (see Steiner, col. 4, lines 47-54) and comprising a fuel receiving region and a fuel flow guiding arrangement provided in the lining member that is considered to influence a flow direction of a fuel and is in the form of a compressed material that also forms a groove (see Steiner, Figs. 1 and 2 and space/groove 8). The lining member/sieve element (6) surrounds a fuel supply region (center of fuel supply pipe 1).

Conclusion

4. This action is made non-final. A THREE month shortened statutory period for reply has been set. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no

Art Unit: 3749

event, however, may a reply be timely filed after SIX (6) months from the mailing date of this communication.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents to Downs, Zwicker, Langen et al., and Japanese Patents Nos. 2-68406 and 2001-116213 (English abstracts included) are cited to further show the state of the art concerning combustion chamber linings made of porous material.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://portal.uspto.gov/external/portal/pair>. Any questions on access to the Private PAIR system should be directed to the Electronic Business Center (EBC) at (866) 217-9197 (toll-free).
